

BIM Content Management

Pilot Program

How You Succeed

Improve productivity within your team's testing time frame.

Accelerate the learning and decision-making process.

Collaborate with your team using their content and project.

Access AVAIL's designated consultants during any phase of the process.

Leverage your investment. All Pilot work seamlessly transitions to your rollout.

Gain the Insight You Need For a Successful Roll Out

At AVAIL, we understand that choosing the right design management software is a deliberate, thoughtful process — one that provides BIM Managers the chance to thoroughly assess a product within their unique environment. Our Pilot Program was developed with this in mind. The goal is to provide decision makers a productive way to gain the product knowledge and assistance they need in order to confidently move forward with their purchase.

By entering AVAIL's Pilot Program you're committing time and resources to evaluate our product as the best-fit software for your situation. And we're committing as well by providing you access to our full product feature set, team training, and customer support. An approach to help you build a foundation that can be used to lead your firm towards smooth adoption and successful deployment. It's time well spent, as the work you produce under our program can all be applied to your commercial roll-out.

What the Pilot Program Includes

License: Our program lets your end users test the value of AVAIL in a live, collaborative environment that includes:

- Initial one-hour consultation to determine requirements and introduce team members.
- One-hour remote training session to accelerate team onboarding.
- Four hours of AVAIL Customer Success team time to help you address any issues
- Channel setup to review admin capabilities and test user level privileges.
- File publishing that allows your team to work with their content on an existing or upcoming project.

Professional Services: As part of the Pilot Program AVAIL will extract all the digital assets from a recent project so your designers can organize, tag, and use their own content directly in AVAIL. And our analytics dashboard will provide you insight on what, when and how the content is being used.

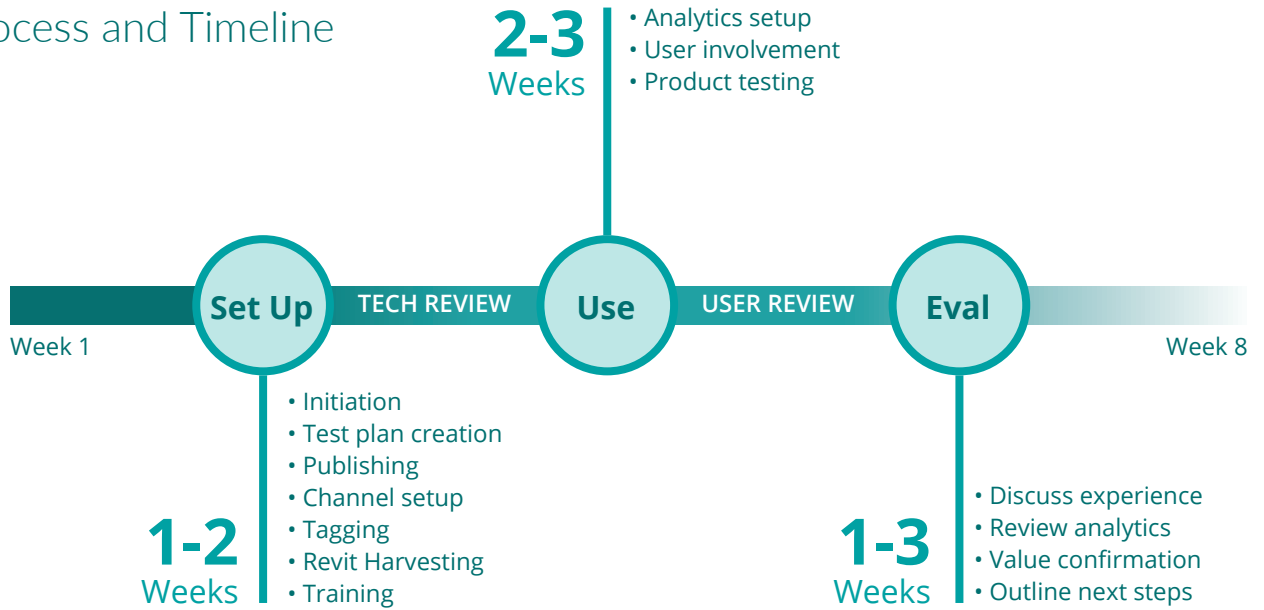

Revit Harvest for one project lets your team work within AVAIL's seamless Revit integration.

Tag Generation, review, and assistance to easily organize and retrieve resources.

Analytics setup to view utilization and track content.

Typical Process and Timeline

8 Weeks
