AVAIL Browser for Revit 5.0 Release Notes (released 1/9/2023)

The following new features were delivered as part of the **Version 5.0** release of the AVAIL Browser for Revit.

This is the public release of the new workflow of the AVAIL Browser for Revit.

AVAIL Browser (Version)	Application Versions Supported
AVAIL Browser for Revit (5.0.1)	Autodesk Revit 2018, 2019, 2020, 2021, 2022, 2023

AVAIL Browsers 5.0 Release Notes

AVAIL Browser Core

New

- Introduces new drag-and-drop workflow for loading Revit content from AVAIL Desktop.
 - Pop-up window
 - Drag-and-dropping Revit content objects into the active session of Revit displays a modal window of the document's loadable elements.
 - Keeping the Pop-up window open and selecting another Revit content object from AVAIL Desktop automatically opens and displays the file's

contents.

- Adds support for downloading Revit elements hosted in BIM360/ACC Docs through Autodesk Desktop Connector on release of drag-and-drop operation
- Redesigned UI
 - Simplified display of elements in a Revit content object and reduction of options condensed into an options menu.
 - Checkboxes next to the Revit element in a list to make selection of items intended to load clearer to the user.
 - Ability to Select All/Select None option with checkbox control.
 - Parameters tab groups items based on Family Type for Family content objects.
- Removal of dependencies (.dll files) to reduce conflicts with other Add-Ins in Revit
- Family content object with one element automatically loads into the active project on drag.

Fixed

- Fixed issue with Add as Tag Context Menu item not displaying
- Fixed margin issue in alert dialogs
- Fixed issue with Pop-up window placement on multiple monitors
